--	--

- Angular skills, TypeScript.

## PROJECTS

---

**E-commerce Website.** Architected and developed a robust and scalable e-commerce platform utilizing React for the dynamic and interactive front end, Tailwind CSS for modern and responsive UI design, and Spring Boot for a powerful and secure back end. Implemented advanced user authentication and authorization mechanisms using Spring Security, ensuring secure login functionality and role-based access control for different user types.([Source Code](#))

**RocketChat Web App.** Rocket Chat provides real-time translation functionality by using ReactJS, NodeJS, Express js, and Mango DB. Rocket Chat web app is a dynamic and user-friendly web-based platform designed to facilitate seamless communication and collaboration among users across various devices and locations. ([Source Code](#))

**Library Management System.** Developed a comprehensive Library Management System for schools and colleges using Angular 15, JWT Authentication, and MySQL. Streamlined book management processes, making it easy to handle book transactions in the library, including managing book orders, returns, and fine calculations. Implemented student registration and login functionality, allowing students to view available books. Provided admin capabilities to insert and delete books and enable or disable services for students. ([Source Code](#))
